

TOIT POUR TOUS

— Tous pour toi —

TOIT POUR TOUS eco-village in the Island of Mauritius

LET'S MAKE MAURITIUS AN ISLAND EXAMPLE

Based on the synergy generated between the **Suisse Romande Rotary Clubs** and the **Rose-Belle Rotary Club**, a large-scale project will begin in 2017 and will very certainly continue beyond 2018: to establish an energy self-sufficient eco-village, with dwellings intended for the poor or people in distress.

Toi(t) pour tous plans to support people in need on their path to a new life, thanks to a concept including housing and a return to employment.

It is this concept we are planning to establish in [Mauritius \(Ile Maurice\)](#), with the help of several NGOs: [GIVE - NGO - Giving Is Vital Enthusiasm](#) , [Warm Heart Foundation](#) and naturally with the support of the **Rotary Clubs** in Mauritius and French-speaking Switzerland.

The project focuses on several areas :

1/ Skills transfer and more widely, training

Toi(t) pour tous plans to provide the expertise and funding to build the houses, the aim being to train the buildings' future occupants in different trades, so that in return, they can help their neighbours build their houses.

2/ Respect for the environment and the preservation of our natural resources

The construction of this eco-village envisages energy independence for its inhabitants. Solar panels provide the houses with electricity, water will be recycled using mini-purification units and rainwater will be collected for watering the gardens. Houses will be built either from wood or recycled plastic bricks, this latter option involving setting up a plastics treatment plant in Mauritius, something that can certainly be envisaged subsequently.

3/ The fight against poverty

These dwellings are initially intended for people in distress and the needy, for women wanting to give their children a future, freeing themselves from the yoke of a violent or alcoholic husband, etc.

4/ Peace

In providing each inhabitant with decent housing and a job, we hope, through this project, to reduce lawless areas, where drugs and alcohol rule and thus reduce fights in the villages.

5/ Enhancement of Mauritius' heritage

Today, luxury tourism no longer means large hotels and underpaid staff at the service of rich customers. Now, luxury tourism throughout the world involves

TOIT POUR TOUS

— Tous pour toi —

an ethical and spiritual element; travellers are willing to pay 1500 to 2000 euros per week to share quality time with the local population.

We see the opportunity provided by these eco-villages, therefore, to (re)discover and explore Mauritius in another, more authentic manner while preserving the country's natural heritage. The project is on the move. It will be brought from Switzerland by the NGO Toi(t) pour tous, to Mauritius by Rose-Belle Rotary Club, which, in the weeks to come, will invite other Rotary Clubs to help organize the fund raising. We are pleased to be able to include NGOs such as [GIVE - NGO - Giving Is Vital Enthusiasm](#) and [Warm Heart Foundation](#) in this project for their respective skills in the field of the fight against poverty and the construction of social housing. We would also like to thank [FredeRita Le Gall](#) for her study concerning wooden houses, with cost optimization, [Alain Bertrand](#) for his knowledge of the country and his support in the ecological field, [Kenny Boobhun](#), a Mauritian expatriate living in Switzerland and an Architect by training, who immediately responded to the call when we began to talk about the project, as well as [Luc Malchaire](#) for his mobile application, which makes the work of all the volunteers so much easier and Maiti Chagny, the architect involved in [Warm Heart Foundation](#).

To show your support for this project, we would ask you to “like” the Rotary Club’s facebook page and TOIT POUR TOUS’s page for advance information concerning our actions. We would also ask you to share this article with as many people as possible. Union means strength. It is the duty and in the interest of each of us, living in Mauritius or who love this country, to support the Rotary Club in each of its actions. Together, let’s make Mauritius an example by this new model of sustainable development.
